

MINGenerator is the ultimate system for creating MIN numbers in bulk for your correspondents. In just minutes create one to thousands of MIN numbers and instantly send the list off to your correspondents. With the option to create MIN numbers as text or as an Excel spreadsheet there are endless ways to distribute the list to your correspondents. Print to labels, send as email directly from MIN Generator, convert to a word processing document to merge into LOS or document system, the option is yours.

More than just a way to generate MIN numbers, MIN Generator includes a built in tracking system registering each batch of MIN numbers to the assigned correspondent. In addition to the built in MIN validation system, MIN Generator includes a MIN validation program where a single MIN number may be entered and validated.

Benefits include:

- Create batches of MIN numbers from one to thousands
- Track all MIN numbers issued to correspondent, date issued, quantity of MIN numbers distributed, MIN number range
- Built in correspondent registry
- MIN number lists available as Excel spreadsheet or ASCII Text file
- Automated email distribution system
- Built in MIN number Validation program

Support: Each software license purchased includes 30 days free support.
